FLIGHT ASSURANCE

PRESS RELEASE

Flight Assurance Announces IS-BAO Audit and Implementation Services *New service offering strengthens portfolio of client services*

Upper Jay, April 28, 2010: Flight Assurance today announced the addition of IBAC (International Business Aviation Council) IS-BAO (International Standards for Business Aviation Operations) external auditing and implementation services for its worldwide clients.

The company's consultancy service unit had previously completed the precursor Aviation Lead Auditor Training (ALAT) program through ARG/US Pros. "I am very pleased to finally be able to offer a full spectrum of audit and implementation services," said J. Bruce Huffman, President and Chief Executive Officer of Flight Assurance.

"The addition of external IS-BAO auditing and implementation services will add a critical tool to our host of service products for the aircraft operator. Many of our clients are facing the 18 November, 2010 implementation date, requiring an approved SMS in place for flight operations within the European Union. IS-BAO registration allows them to meet that goal!" Huffman noted. Flight Assurance has a host of consulting services and affiliated companies that offer a wide range of value added services to the operators of business aircraft.

Headquartered in Upper Jay, NY, Flight Assurance is one of the nation's newest aviation consultancies specializing in consulting services for the operators of business aircraft.
